FS95/C3 100	100	Flexible Secondary Pouch 95kPa C4 x 100	305 x 435	300

MedDX FS95 is a range of flexible secondary pressure pouches designed as secondary packaging. The pouches are leak-proof and capable of withstanding an internal pressure differential of 95kPa. Available in various sizes, suitable to hold a wide range of primary containers, such as blood tubes, specimen containers and swabs.

The pouches are easy to close. They are sequentially numbered and incorporate a tamper-evident seal to ensure ease of identification and security throughout the chain of custody.

An external document wallet is featured on the C5 and C4 sizes.
