MedDXTAINER Medical Sample Carrier

Products	Components	Sample Collection Kits	Guidance
----------	------------	------------------------	----------

Product Code	Description	Ext. Dimensions
MDXT/3	MedDXTAINER 3	395x 295 x 210 mm
MDXT/4	MedDXTAINER 4	395 x 295 x 315 mm
MDXT/5	MedDXTAINER 5	395 x 295 x 420 mm
MDXT/4I	MedDXTAINER 4 EPP Insulated	320 x 225 x 210 mm (Internal)

The MedDXTAINER is designed for collecting multiple samples from multiple sites and is often used by medical couriers and hospital transport.

MedDXTAINER contains regulatory markings and can be used as a secondary and outer layer if used with certified 95kPa primary containers. If primaries are not 95kPa or this is uncertain MedDX advises the use of the MedDX FS95 pouch to ensure compliance.

This ABS plastic carrier with carry handle is lockable and can be stacked, thus enabling three or four units to be carried. Both MedDXTAINER 4 and 5 models can be available with durable EPP insulated liners and cool packs.

A range of accessories are available including shoulder straps, trolley, security components and EPP insulated liners for refrigerated shipments.
